Abdirahman Abdiaziz

Data and insight analyst · SQL, reporting and operational performance

Bristol, United Kingdom · remote abdiaziz141024@gmail.com +44 7576 749072
Portfolio and CV · github.com/Abdiaziz96

PROFILE

Data and insight analyst with two years and eight months of continuous commercial experience, September 2020 to May 2023 — BI analysis at Confused.com, data management at CeRID, and independent consulting. Comfortable combining data from multiple sources in Microsoft SQL Server, building dashboards in Tableau, and turning a messy stakeholder question into something short enough to act on. Two years in transport operations at DHL Supply Chain, so I know how operational performance data is produced as well as reported.

KEY SKILLS

SQL	T-SQL · Microsoft SQL Server · SSMS · combining datasets from multiple sources · joins and aggregation
Reporting and dashboards	Tableau · Excel · Google Sheets · dashboard and report design · KPI reporting · ad hoc analysis
Operational insight	operational and customer performance · trends and root causes · recommendations · impact review
Stakeholders	requirements gathering · business questions into outputs · presenting to senior audiences
Data quality	validation and discrepancy investigation · master-data standards · CRM data in HubSpot
Automation and delivery	SSIS bulk loads · CI/CD · Azure DevOps · Git · Microsoft Azure
Building	agentic AI environment — model routing, tool servers, cost controls · pair programmer for SQL and Python
Developing	Power BI and DAX for PL-300 · intermediate SQL · Python and pandas

EXPERIENCE

HGV driver · Class 1 (Cat C+E)

Mar 2026 – present

DHL Services Limited, Severn Beach, Bristol

- Joined DHL on 30 March 2026; on the Driver – LGV contract since 1 September 2026, driving Class 1 after passing the Category C+E test.
- Daily use of DHL operational systems — digital tachograph, handheld proof-of-delivery capture, and defect and incident reporting — so I know where depot data is created and where it goes wrong.
- Tachograph records, drivers' hours and rest regulations, and load security to DVSA standards: accuracy and compliance against a strict rulebook.

HGV Class 2 driver · agency

Jan 2025 – Mar 2026

HGV agency work across the South West · multi-drop city delivery, 32-tonne flatbed, tachograph records and load security to DVSA standards

Co-founder · data consulting, then sales development

Sep 2022 – Apr 2025

Tech&City · Nairobi, Kenya and remote

- Worked independently with non-governmental organisations to review how they captured, stored and used data, and to write plain-language assessments of where the process was failing.
- Built and cleaned research and lead-generation datasets using scripted web scraping — extraction, de-duplication and validation before use.
- Managed data-owner relationships through to completion: agreeing what a clean record looked like, then tracking the work against it.
- From September 2023 the focus moved to sales development: outreach by phone and email, HubSpot CRM data maintenance, and review of outreach performance against response data.

Data Specialist

Oct 2021 – Sep 2022

CeRID (Centre for Research and Integration Development) · Nairobi, Kenya · contract

- Data management across development programmes: collection, validation, standardisation and storage of project data.
- Worked with HR and monitoring and evaluation officers — the internal owners of the data — to make project activity and outcomes reportable.
- Built lead-generation and research datasets using web scraping.

Business Intelligence Analyst

Sep 2020 – Sep 2021

Confused.com

- Built reports and dashboards in Tableau used for product and customer decisions, working from tickets raised by product and customer stakeholders.
- Queried and transformed data in Microsoft SQL Server through Management Studio, and used SSIS to bulk-load data into reporting tables.
- Worked alongside the data engineering team on CI/CD pipelines so database changes could be released to the live site without breaking it.
- Completed Microsoft Azure Fundamentals during this role.

QA Test Engineer · frontend automation

Jul 2018 – Jul 2019

GameBench · Bristol

- Built scripted, repeatable automation: end-to-end flows in Protractor and Selenium, and unit and integration tests in Mocha and Chai.
- Extended the automated suite so regressions were caught by script rather than by hand, cutting the manual regression testing the team needed.
- Reproduced and triaged defects and confirmed fixes before release — structured error resolution.

Teacher and tutor · part-time

Feb 2018 – Dec 2020

BTIT (Bristol Taleem Islamic Institute) · Bristol

EDUCATION

BSc Computer Science

Cardiff University · two years completed

Modules included Database Systems, Data Processing and Visualisation, and Problem Solving with Python.

Full-Stack Engineering

Mayden Academy · Aug 2020 – Dec 2020

Twelve-week bootcamp: PHP, SQL, JavaScript, React and unit testing.

CERTIFICATIONS AND LICENCES

Microsoft Azure Fundamentals

Microsoft

Introduction to SQL Fundamentals

In progress, 2026

Microsoft PL-300 — Power BI Data Analyst Associate

Working towards, 2026

Microsoft DP-700 — Fabric Data Engineer Associate

Planned, 2027

Databricks Certified Data Engineer Associate

Planned, 2027

Licences

Full UK driving licence; Category C and Category C+E; Digital Tachograph Card

Right to work in the United Kingdom, no restrictions. References available on request.
